## Introduction

### Steadyrack revolutionises bike storage and parking

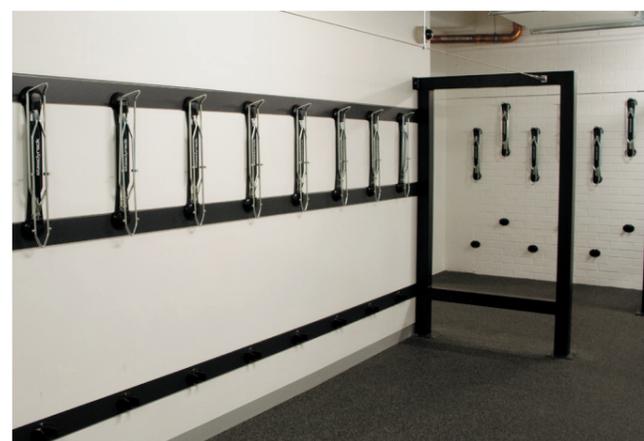

Steadyrack's innovative patented design has revolutionised bike storage. Our racks save more space whilst allowing users to easily load and unload their bikes, addressing the two most challenging issues when sourcing a suitable bike rack. In addition our unique design cradles and protects bikes from damage and from damaging other bikes, cars or anyone in the vicinity without sacrificing functionality. Our customers love them and we think they look great too.

# Features and advantages.

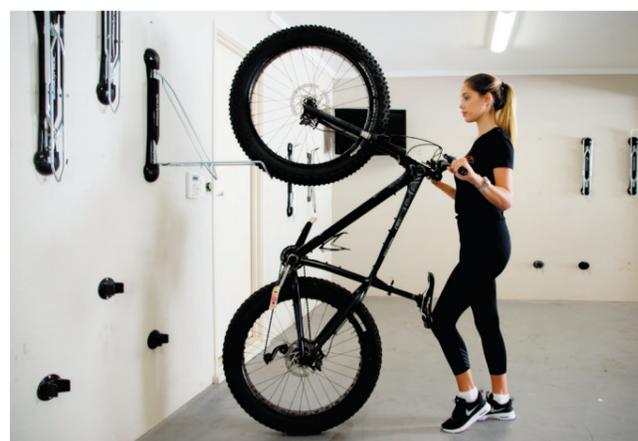

## Steadyrack bike racks offer owners and users a total bike parking solution

### Save valuable space

Steadyrack's revolutionary design saves more of your valuable floor space. Steadyrack bike racks can be mounted to virtually any wall and will conveniently swivel almost 180 degrees from side to side to lie flat. Steadyracks can be installed as close as 350mm apart, and due to the swivel action, can be overlapped. When the rack is empty, the arms fold away.

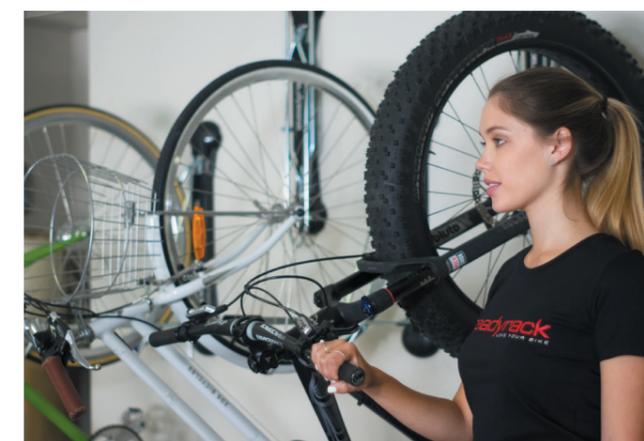

### Easy to use

Our racks are loved by bike riders because there is no lifting required. The Steadyrack works using a pushing and pulling action to load and unload bikes making it suitable for people of all ages and strength.

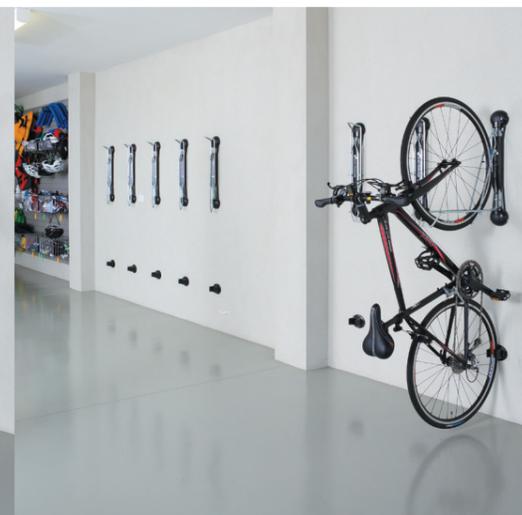

### Safe and Secure

Bikes fit snugly into Steadyrack bike racks. There is virtually no risk of bikes falling over or falling out of the Steadyrack, making them safer to use and minimizes the risk of damaging adjacent bikes or causing injury to users.

### A total solution

The Steadyrack range is suitable for bikes of all sizes even those with tyres as wide as 5 inches can be supported safely and securely. Steadyrack bike racks will also support bikes with fenders and mud guards, making it an extremely versatile solution for your bike parking requirements.

### Additional features

- **SAFE AND SECURE.** Racks fold away when not in use
- **NO SPOKES, NO PROBLEM.** Suitable for all types of wheels including those with carbon rims
- **PARK BIKES CLOSER TOGETHER.** Overlap bikes to create even more space saving benefits without any loss of function or ease of use
- **NO WALL, NO PROBLEM.** Mount Steadyrack bike rack to existing walls or framing systems
- **LOCK YOUR BIKE.** Bikes can be securely locked to our racks using conventional chain or D type locks

# Planning and installation

LOVE  
YOUR  
BIKE

## Robust and engineered to last

Steadyrack bike racks have been designed to last and built to the highest quality standards. Many hours of engineering and trial and error have ensured we addressed all of the challenges users faced when finding a solution to storing or parking their bikes. The internal mechanism of the rack has been specially engineered using a custom designed washer and clutch system which allows the rack to pivot without loosening the assembly nuts and which provides sufficient resistance to allow the user to load a bike at any angle without impeding the pivoting function. The assembly nuts can be tightened to lock the rack into one angle if desired. Our unique patented design is adaptable so as wheel and tyre sizes change so can we.

## Architects and planners are recognising the benefits and features of Steadyrack

Architects and designers know that building owners and managers and their tenants are seeking solutions which provide space efficient and user friendly bike parking options. Steadyrack can provide more bike parking per square metre of space than any other system and the bike riding community are happy because it's easy to use and protects their bikes. Many global architectural firms now specify Steadyrack for all of their End of Trip Facilities due to these unique features. Steadyrack is also suitable whether designing a new building or retrofitting an existing building.

*After a survey of the available options we appreciate the unique design features of the Steady Storage Rack for bicycles.*

Lou Cotter; The Buchan Group

*The result was nothing short of fantastic, we increased our capacity to hold bikes from 20 bikes to over 50 after less than 3 hours of installation.*

Anthony Day, Cycling Rep. CBH

Here are just a few of the global architectural firms who have specified Steadyrack for their projects

**Steadyrack CLASSIC** LOVE YOUR BIKE

The Steadyrack Classic Rack is the ideal storage solution. It is perfect for the majority of bicycles and wheel sizes. Its unique swivel action gives you the option of leaving your bicycle in the central position or swivelling the rack to the left or right as the need arises. This allows you to store a number of bicycles side-by-side, making it the ideal solution for families and businesses alike.

- TYRES UP TO 2.2 INCHES
- TYRES 2.2 INCHES TO 5 INCHES
- BIKES WITH FENDERS
- BIKES WITHOUT FENDERS

The Classic Rack swivels almost 180 degrees from side to side.

**NO LIFTING**  
Place your bike on the back wheel and push it into the rack.

**SPACE SAVING**  
Get more bikes in the same space.

**SNUG FIT**  
Your bike fits snugly in the rack and your bikes protected from damage.

**PIVOTS 180°**  
Swivels almost 180 degrees from side to side.

## See what they're saying about us

LOVE  
YOUR  
BIKE

**The growing number of Steadyrack fans is testament to the quality, functionality and value our racks provide.**

### **Great bike hanging storage system**

By Bilbo on January 10, 2013

*I bought 5 of these in early 2012 - they have solved the junk problem in our garage - am hanging road bikes & mountain bikes including a 29er. I have Zipp carbon wheels & the way these hold the bike (no hook on the rim) doesn't damage the wheels. The ability to 'fold' the bike against the wall is great & space saving.*

### **My garage used to be a maze of stuff.**

By david piombino on July 26, 2015

*My garage used to be a maze of stuff. This rack is so simple but works so well. Even my wife and daughter can put their bikes away.*

### **Exactly what I was seeking.**

By Tyson R. Smith on June 10, 2015

*Purchased 2 to hold my road bikes. Couldn't be happier. Mounted into concrete block walls.*

### **Good Option For Tight Spaces**

By Ryan A. Craighan on April 25, 2015

*I've got a standard size two car garage with a 16' door and not quite 2 additional feet on either side. With the front of the garage dedicated to trash cans, shelves, tool chest, and the lawn mower, the challenge was to get the bikes out of the way of the car doors without giving up too much wall space.*

### **Massive Space Saver for an Urbanite**

By Urban Hermit on April 19, 2015

*Excellent. Very sturdy and goes 180 degrees to the wall (my apt is teeny tiny so this was really important). Easy to get up and take down. I put it up alone, but having someone else around would have definitely made it easier. Tried to take two pictures for reference, one at 90ish degrees to the wall and one as 180 degree as possible. Highly recommend!*

### **Finally....an organized garage**

By Brody Jones "Brody Jones" on March 14, 2015

*This is an excellent bike rack. I bought two to hang mountain bikes on the wall. I hung the racks at the same height but spaced them 32 inches (two wall studs distance) apart. This enables the bikes to lay flat against the wall whereas the handlebars do not touch. A little pricy for a bike rack but well worth the money.*

### **Best Bike Rack on the Market**

By Rachel Davison on April 13, 2015

*Highly recommend this bike rack. Unique, space-saving design securely holds bike and allows for installation in small areas. The rack allows you to rotate the bike 180 degrees while it is in the rack. This makes it possible to move the bike out of the way by turning it to the left or right to access other items in our garage. Also, you do not need to lift the bike off the ground to get it into or out of the rack, which makes it easy for young kids and others lacking upper body strength to use. Installation was simple and quick, following easy instructions that come with the rack. We have been using this rack for about nine months and love it. It is well made and sturdy. It was well worth the slightly higher price for the flexibility, durability and convenience it offers.*
